

## **PROJECT ENGINEER**

### **LOCATIONS**

**AUSTRALIA:** Brisbane, QLD or Melbourne, VIC or Perth, WA

**SINGAPORE:** Singapore

## **ABOUT OUR COMPANY**

Stanbury & Co. is a research, advisory, implementation and operational private equity house. Our project experience includes more than \$1 billion of projects at various development stages.

Our client portfolio includes renowned entities in the Fortune 500, Forbes Global 2000, Private Equity Funds, Leading Private Companies and Trade Organizations.

In addition, Stanbury Labs, an affiliate of Stanbury & Co., is involved in the development of technology solutions powering various proprietary and client infrastructure, e-commerce, B2B and B2C enterprises and organizations operating globally across various industry verticals.

## **JOB DESCRIPTION**

You will be part of a global team made up of technical, business and operational experts playing an active role in all aspects of the client engagement, both internal and external.

The role will focus on multiple client engagements across multiple industries with a focus on commodities including energy and mining while working with colleagues and clients in a range of industry and functional areas.

## **ESSENTIAL RESPONSIBILITIES**

In this role, you will:

- Develop and manage project plans associated with assigned project.
- Manage all activities comprising a project and the internal / external project resources into a totally integrated, coordinated, safe and controlled effort to satisfy or exceed client expectations.
- To enable these outcomes to be achieved, the Project Manager is responsible for managing and co-ordinating all project processes from start of the project phase to

completion of the Review/Closure phase, whilst ensuring a smooth transition between all phases of their assigned project.

- Key objectives are;
  - Ensuring agreed project delivery process is consistently applied
  - Ensuring compliance with Occupational Health and Safety legislation and systems
  - Meeting and exceeding client requirements

## REQUIREMENTS

- Undergraduate or Masters level degree in Engineering or related field from an accredited university
- A minimum of 5 years of professional experience in the mining and energy industries
- Strong business acumen, strategic thinker and ability to work across business lines and industry verticals
- Excellent oral and written communications skills with a knack for compelling storytelling and the innate ability to make the complex simple
- Strong interpersonal and leadership skills
- Strong analytical and process skills
- Demonstrated skills in managing multiple projects successfully
- Leadership: Ability to influence in a cross-functional environment, work with global teams and establish credibility across diverse customer cultures
- Personal Attributes: Excellent verbal and written communication skills, ability to listen and translate customer feedback to drive product and service roadmap
- Ability to work collaboratively in a team environment including with remote team members globally
- Ability to work effectively with people at all levels in an organization
- Demonstrated ability as a self starter
- Have strong visual skills with careful attention to detail
- Ability to prioritize and manage work to adhere to critical project timelines in a fast-paced ambiguous environment
- Experience working with cross-functional teams
- Demonstrated commitment to meeting and exceeding project requirements
- Juggling multiple projects while effectively managing timelines and expectations
- Ability to thrive in an unstructured and dynamic environment
- Proficiency in English, both spoken and written in a professional environment
- Ability to work with global teams in different time zones and of different cultures
- Willingness to travel regionally and internationally

## WORKING CONDITIONS

- This role will be on a full time basis
- Compensation commensurate with experience
